

## MEET AT OUR LOCAL BASE

*Trips meet at our campsite base with its shady lawns, vineyards and palm trees*

*We send a full Briefing and GPS/map showing you how to get to the base, in the Upington-Kakamas-Onseepkans region of the Orange.*

There are hot showers and nice lawns with restaurant nearby. Allow an extra day or two to visit Augrabies Falls, the Riemvasmaak hotspots and the wine route. Best time to visit the Northern Cape and Kalahari is the cool time – midyear – called the Green Season. Near the base are small rapids, ideals for learning the basics of paddling and safety, so we start with an easy day of river familiarisation to get your group working as a team.

# Adventures on South Africa's greatest wilderness river

Rivers are vital to the survival of life on Earth and yet are little understood. Join river pioneer Graeme Addison to learn about river paddling and explore the ecology of the river, its wildlife, archaeology and history. Graeme has written two books about the world's rivers. He designed the "Croc" inflatable, and launched South Africa's popular rafting trails as well as the first SA river guide school. You're in good hands!
